                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         constant regions. In the humanized light chain, amino acids L45, L58 and L59 in the human kappa LC VR framework are replaced by the anino acid present in the equivalent position of the mouse by the anino acid present in the equivalent position of the mouse 21.6 ig L chain. Plasmids encoding the chimeric antibodies are 21.6 ig L chain. Plasmids encoding the chimeric antibodies can be used transfected into Cos cells. The humanized antibodies can be used for inhibiting adhesion of a leukocyte to a rendethelial cell and for inhibiting adhesion of a leukocyte to a multiple sclerosis. They for treating inflammatory diseases such as multiple sclerosis. They can also be used in the treatment of stroke, cerebral traumas, can also be used in the treatment of stroke, cerebral traumas.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The sequence encodes the mouse antibody 21.6 heavy chair variable region, Ha, directed against leukocyte adhesion molecule VIA-4. Cloned cDNA sequences of mouse 21.6 VL and VH (AAQ99889 and AAQ9989) regions are linked to human constant regions in the construction of a humanized are linked to human constant regions in the construction of a humanized are nithody against VIA-4. The 5 and 3' reads of the mouse cDNAs are motified using PCR primers (See AAQ99895-98) and then subcloned into mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or gamma-1 mammalian cell expression vectors containing human kappa or g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    detecting VLA-4, for affinity purification or for generating
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              anti-idiotype antibodies
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               antibody engineering

In the humanized heavy chain, hape or gamma 1 constant regions. In the humanized heavy chain, and per constant regions of the mouse 21.6 Hg Hgb, Hdb, Hd Hd Hd Hd In the human Re VN Interest in the equivalent framework are replaced by the amino acid present in the equivalent position of the mouse 21.6 Hg H chain. Plasmids encoding the position of the mouse 21.6 Hg H chain. Plasmids encoding the chain interest antibodies are transfected into COS cells. The humanized antibodies can be used to inhibit adhesion of a leukocyte to an intibodies can be used to inhibit adhesion of a leukocyte to an encodational cell and to treat inflammatory diseases such as multiple solutions. They can also be used in the treatment of stroke, selerosis. They can also be used in the treatment of stroke, selerosis used for detecting VLA-4, for affinity purification or for also be used for detecting VLA-4, for affinity purification or for
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The sequence represents the human reshaped antibody 21.6 heavy chain variable region against leukocyte adhesion molecule VLA-4. Cloned cDMA sequences of mouse 21.6 VH (AAQ9982) and VL (AAQ9882) cloned cDMA sequences of mouse 21.6 VH (AAQ9982) and VL (AAQ9882) construction regions are linked to human constant regions in the construction regions are linked to human constant regions in the construction of the farman and 3 construction mouse collars are modified using PCR primers (AAQ9985-88) and then mouse cDMAs are modified using PCR primers (AAQ9985-88) and then subcloned into mammalian cell expression vectors containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing human containing huma
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      (ATHE-) ATHENA NEUROSCIENCES INC
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              25-JAN-1995;

manufacture of a medicament for treating asthma, atherosclerosis, AIDS, dementia, diabetus, inflammatory bowel disease, risumanoid arthritis, transplant rejection, graft versus bost disease, tumou retastasis, nephritis, atopic dermatitis, psortasis, mycorrdial ischaemia, and acute leukocyte mediated ung injury. The humani antibody has a half-life in the human circulation essentially
                                                                                        This polypeptide, designated Ha, comprises the heavy chain variable region (VH) of a humanised alpha-4 integrin antibody 21.6 (see also ANW22413). It is compased of complementarity determining regions from the VH region (see ANW22410) of mouse alpha-4 integrin monoclonal antibody 21.6 and a modified human 21/28 CL framework. It can be expressed in mammalian host cells following PCR amplification and mumanised 21.6 VH and a humanised 21.6 VL (see ANW22412) can be used to produce a claimed humanised 21.6 antibody that is useful in the
equivalent to that of naturally occurring human antibodies
                                                                                                                                                                                                                                                             asthma, atherosclerosis, AIDS, dementia, etc.
                                                                                                                                                                                                                                                                       Uses of humanised alpha-4 integrin antibody . for treatment of

The antibody may also be used in the affinity purification of alpha-4 integrin for use, as a vaccine or a immunogen. It is also useful for
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           This polypeptide, designated Ha, comprises the heavy chain variable region (VH) of a humanised alpha-4 integrin antibody 21.6. It is composed of complementarity determining regions (CDRs) from the VH region (see AAW22410) of mouse alpha-4 integrin monochone antibody region (see AAW22410) of mouse alpha-4 integrin monochone and the separate of 1.6 and a modified human 21/28 CL framework. It can be expressed in mammalian host cells following PCR amplification and mutagenesis of mouse and human DAM sequences. The of appropriate fragments of mouse and human DAM sequences.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          29-MAY-1997.

                                      The seguence represents the mouse anti-VLA-4 antibody 21.6 heavy chain crisis of wariable region (without signal sequence). Cloned COMA CDR sequences of CC wariable 13th and variable heavy regions are linked to human CC mouse 21.6 variable 13th and variable heavy regions are linked to human CC constant framework regions of the REI antibody for the light chain and CC constant framework regions of the REI antibody for the light chain and CC constant and the subcloned into CC madmalian cell expression vectors containing human kappa or gamma 1 CC mammalian cell expression vectors containing human kappa or gamma 1 CC constant regions. In the human kappa LCVR framework are replaced by the amino CC colls and L69 in the human kappa LCVR framework are replaced by the amino CC colls. The human kappa LCVR framework are replaced into CCS chain. Plasmids encoding the chimeric antibodies are transfected into CCS cells. The humanized antibodies can be used to inhibit adhesion of a semiliple sclerosis. They can also be used in the treatment of sexess such cerebral traumas, maningitis or encephalitis. The antibodies can also be used for detecting VLA-4, for affinity purification or for generating containing the containing variables.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Region
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Region

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       alliked to human constant regions in the construction of a humanized antibody against VLA-4. The 5 and 3 ends of the mouse colks are modified using peck primers (See Anglags-98) and then subcloned into a mammalian cell expression vectors containing human kappa or gammal Constant regions. In the humanized heavy chain, manino acids H27, H28, H29, H30, H44 and H71 in the heavy chain, manino acids H27, by the amino acid present in the equivalent position of the mouse call fight chain. Plasmids encoding the chimeric antibodies are containing that the state of the containing the chimeric antibodies are containing that the chain the containing the chimeric antibodies are containing that the containing the chimeric antibodies are contained to treat inflammatory diseases such as multiple solerosis. They can also be used in the treatment of stroke, cerebral traumans, considered to treat value for affairty metalication.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Matches 100;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A novel humanised Ab (hAb) binds the antigen bound by NR-IU-13. The hAb, specifically NRX451, or its conjugates can be used for the manufacture of a diagnostic or medicament for cancer diagnosts or treatment. The hAb has reduced immunogenicity and toxicity in humans, but retains the ability to bind the NR-IU-13 antigen.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Synthetic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Streptavidin;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A fusion of single chain antibody/streptavidin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              proteins are useful for targeting tumour cells, particularly tumour cells associated with cancer, e.g. adenocarcinomes or hematological malignancies. The vector construct is useful for expressing of streptavidin fusion proteins. In particular, these are useful as tools for medical diagnostics and therapeutic purposes, e.g. for detecting the presence or absence of, or treating, a target site within a mammalian
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        and a cloning site for insertion of a second nucleic acid sequence uncoding a polypeptide to be fused with streppayedint. Interposed between the promoter and the first nucleic acid sequence. Alternatively, the vector construct comprises a first nucleic acid operatively linked to a promoter, encoding a polypeptide to be fused with streptaydin, and cloning site for insertion of a second nucleic acid encoding at least cloning site for insertion of a second nucleic acid encoding at least 23 mains acids of streptaydin or its functional variant. The issue of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of th
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence encodes a fusion of the single chain antibody huRr-LU-10 and streptavidin. The antibody binds the antipen EGP40 or BPCAM. The fusion protein is expressed using vectors of the invention. The specification describes vector constructs for expressing streptavidin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    New vector constructs for expressing genomic streptavidin fusion proteins which are useful for targeting tumour cells associated with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           WPI; 2001-091213/10

                                 AAQ94548 is the plasmid pscrvT7-hu21, which encodes AAR7682 the human antibody ONS-401 Fv fragment. The plasmid was used in the construction of an expression vector, conty, cDMA encoding a human/murine chimeric antibody, reactive with human medullohustoma. (a brain tumour) cells. The chimeric antibody can be blastoma. (a brain tumour) cells. The chimeric antibody can be

The present sequence is a scFv (ragment from the chimaeric human/murine monoclonal antibody (MAD) OMS-M21. The MAD was prepd. by combining light and heavy variable region DNA, from a murine anti-human myeloblastoma cell MAD, with human light and heavy constant region sequences, respectively to produce chimaeric human/murine light and heavy chain DNA mols. A recombinant vector for the expression of the heavy and light chain DNA mols. was
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Matches

The sequence encodes the mouse antibody 21.6 heavy chain variable region, Hc, directed against leukocyte adhesion molecule VAA-4. Cloned are linked to human constant regions in the construction of a humanized antibody against VAA-4. The 5 and 3 ends of the mouse CDNAs are constant regions in the construction of a humanized modified using PCR primers (See AAQ99893-98) and then subcloned into constant regions. In the humanized light than Aappa or gamma-1. L58 and 5. In the humanized light than a mino acids L5.

Claim 13; Page 70; 105pp; English.

inilammatory disease.

for treating

by the amino acid present in the equivalent position of the mouse

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       prepd, and used to transform a host cell. The host cell was then cultured, and the expression prods. of the heavy and light chain DNA mois. sepd and connected with a peptide linker to produce a single stranded by region. The reshaped by region has low human antigenicity, and is therefore expected to be useful as an agent for the diagnosis and treatment of cerebral tumours,

The humanized antibodies can be used for inhibiting adhesion of a leukocyte to an endothelial cell and for treating inflammatory diseases such as multiple sclerosis. The can also be used in the treatment of stroke, corebrat transas, meningits or encephalitis. The antibodies can also be used for detecting VLA-4, for affinity purification or for generating detecting VLA-4, for affinity purification or for generating
